

BUNDESAMT FÜR  
SEESCHIFFFAHRT  
UND  
HYDROGRAPHIE

# BOOS Web WG Report 2019

Jan H. Reißmann  
Rostock, 13.06.2019

## (Community) Products

- MME: currents, uncertainty estimates, warning system, and validation
- Product quality information on the forecast products from CMEMS Baltic MFC

## Documents Section

- Historical Annual Reports 2014 and 2015 (from Urmas)
- Reference Documents (Strategies, MoUs, Agreements)
- Annual Meeting Documents 2019

- Inventory performed
- Suggestion for reorganisation under constraint of minimal effort made for:
  - Top Menu item *Programmes*
  - Main Menu items *Products, Forecasts, Observations, and Community Products*

# BOOS.org suggested reorganisation

BUNDESAMT FÜR  
SEESCHIFFFAHRT  
UND  
HYDROGRAPHIE

## Top Menu item *Programmes*:

note on BOOS structure regarding Programmes, links to drop down menu sites

**Top Menu item *Programmes/Modelling Programme*:**  
general information on BMP (such as goals/objectives, members, manager etc.), links to reference documents (such as agreement on BMP, work plan etc.)

**Top Menu item *Programmes/Observations Programme*:**  
note on current status of BOB (partners negotiating agreement (=potential members), lead of drafting the agreement etc.), links to reference documents (draft of agreement on BOB etc.)

# BOOS.org suggested reorganisation

## Top Menu item *Programmes/Projects*:

note on existence of projects and in case there are projects brief note on those projects (goals/objectives, current status, partners, lead partner, contact person etc.), links relevant websites and documents

# BOOS.org suggested reorganisation

## Replace Main Menu items

*Products, Forecasts, Observations, and Community  
Products*

**with**

*Data, Observations, Simulations, and Products*

## Main Menu item *Data*:

Should contain contents regarding general information about the data (metadata) and maybe has to be differentiated by observations and simulations later on. For example, this also would be the place to describe the models used in BOOS as suggested at last AM.

## Main Menu item *Observations*:

Should contain data presentations (pure data viewers, for example) of directly observed data (i.e. target parameters of measurements),

## Main Menu item *Simulations*:

Should be almost the same as *Observations*, but for directly simulated data (i.e. output variables of models).

## Main Menu item *Products*:

Should contain contents which are in some way processed or value added data from *Observations* or/and *Simulations* (i.e. further calculations or estimations from the primary data) or evaluations (online reports or assessments, for example) and so on.

- Down time of a couple of days in December 2018 due to unpaid fee for domain (problem solved by Vibeke)
- Domain could be provided by EuroGOOS (as for NOOS)
  - EuroGOOS paying the fee for it and also for minor maintenance, modifications/extensions by BlueLobster
  - BOOS having to change the domain name from [www.boos.org](http://www.boos.org) to [boos.eurogoos.eu](http://boos.eurogoos.eu)
